## Lösungen · Satz des Pythagoras

**1.** $\mathbf{AB = 10\sqrt{13} \approx 36{,}1\ m}$ ..... $AB^2 = 12^2 + 34^2$

**2.** **1**
$\mathbf{BF = 55\ cm}$ ..... $BF = 80 - 25$
$\mathbf{AB = 5\sqrt{146} \approx 60{,}4\ cm}$ ..... $AB^2 = 25^2 + 55^2$

**3.** $\mathbf{Stab = \sqrt{89{,}96} + 2 \approx 11{,}5\ cm}$ ..... $d = 2 \cdot 3{,}2 = 6{,}4;\ d^2 + 7^2 = s^2$
