Lösungen · Winkel aus Winkeln

1. **a) 180°; b) 112°**

2. $\boldsymbol{\beta = 112°}$ $\beta = 180° - 68°$

3. $\boldsymbol{\gamma = 118°}$ $\gamma = 180° - 62°$

4. $\boldsymbol{\gamma_1 = 56{,}4°}$ $\gamma_1 + 33{,}6° = 90°$

5. **gleichschenklig);** $\boldsymbol{\gamma = 50°}$ $\mathrm{BC} = 7$ cm ($\alpha = \beta$
$\gamma = 180° - 65° - 65°$

6. **gleichschenklig, Basis AB** $\sphericalangle\mathrm{A} = \sphericalangle\mathrm{B} = 45°$

7. **in beiden Dreiecken je 45° bei C:**
45° + 45° = 90° $\mathrm{AD} = \mathrm{DC} = \mathrm{DB} = 3$ cm

8. $\boldsymbol{\gamma = 90°}$ $\mathrm{AF} = \mathrm{FC} = \mathrm{DF} = 28$ cm
$\sphericalangle\mathrm{ADF} = \sphericalangle\mathrm{FDC} = 45°$
