Lösungen · Winkel aus Winkeln

1. **a) 180°**
b) 112°

2. **$\beta = 112°$** ..... $\beta = 180° - 68°$

3. **$\gamma = 118°$** ..... $\gamma = 180° - 62°$

4. **$\gamma_1 = 56{,}4°$** ..... $\gamma_1 + 33{,}6° = 90°$

5. **a) gleichschenklig)** ..... BC = 7 cm ($\alpha = \beta$
b) $\gamma = 50°$ ..... $\gamma = 180° - 65° - 65°$

6. **gleichschenklig, Basis AB** ..... $\sphericalangle A = \sphericalangle B = 45°$

7. **45° + 45° = 90°** ..... AD = DC = DB = 3 cm

8. **$\gamma = 90°$** ..... AF = FC = DF = 28 cm; $\sphericalangle ADF = \sphericalangle FDC = 45°$
