# sin, cos, tan Lösungen · mehr

| | | |
|---|---|---|
| **1.** | **AB ≈ 1118 m** | AB = 1400 · sin 53° ≈ 1118,1 m ≈ 1118 m |
| **2.** | **AD ≈ 842,5 m** | AD = 1400 · cos 53° ≈ 842,5 m |
| **3.** | **tan $\alpha$ = r/s** | tan $\alpha$ = r/s |
| **4.** | **x = 18** | x = 9 : sin 30° = 9 : 0,5 = 18 |
| **5.** | **sin $\alpha$ = r/t** | sin $\alpha$ = r/t |
| **6.** | **C: sin $\beta$ = b/a (dritte Option)** | sin $\beta$ = b/a (dritte Option) |
| **7.** | **sin $\beta$ = r/t** | sin $\beta$ = r/t |
| **8.** | **$\alpha$ ≈ 54,0°** | Unterschied der Seiten 14 − 6 = 8 cm; tan $\alpha$ = 11 : 8 ⇒ $\alpha = \tan^{-1}(\frac{11}{8}) \approx 54{,}0°$ |
| **9.** | **$\alpha$ ≈ 65°** | cos $\alpha$ = 5 : 12 ⇒ $\alpha = \cos^{-1}(\frac{5}{12}) \approx 65{,}4° \approx 65°$ |
| **10.** | **Berghöhe ≈ 61,0 m; D liegt auf 61,0 + 10,0 ≈ 71,0 m** | BC = 118,8 · sin 30° ≈ 59,4 m; Berghöhe = BC + 1,6 ≈ 61,0 m; D liegt auf 61,0 + 10,0 ≈ 71,0 m |
| **11.** | **PB ≈ 1,85 m** | PB = 1,35 : tan 36,1° ≈ 1,85 m |
| **12.** | **BD ≈ 440 m** | ∠CAD = 90° − 52° = 38°; ∠DAB = 71° − 38° = 33°; BD = 677 · tan 33° ≈ 440 m |
