Lösungen · Satz des Pythagoras

1. **1**
BF = 55 cm ..... $BF = 80 - 25$
AB = $5\sqrt{146}$ ≈ 60,4 cm ..... $AB^2 = 25^2 + 55^2$

2. **Stab = $\sqrt{89{,}96}$ + 2 ≈ 11,5 cm** ..... $d = 2 \cdot 3{,}2 = 6{,}4$; $d^2 + 7^2 = s^2$

3. **AB = $10\sqrt{13}$ ≈ 36,1 m** ..... $AB^2 = 12^2 + 34^2$
