Lösungen · Satz des Pythagoras

1. **1**
BF = 55 cm ..... $BF = 80 - 25$
AB = $5\sqrt{146}$ ≈ 60,4 cm ..... $AB^2 = 25^2 + 55^2$

2. **Stab = $\sqrt{89{,}96}$ + 2 ≈ 11,5 cm** ..... $d = 2 \cdot 3{,}2 = 6{,}4$; $d^2 + 7^2 = s^2$

3. **AB = $10\sqrt{13}$ ≈ 36,1 m** ..... $AB^2 = 12^2 + 34^2$

4. **h = $3\sqrt{95}$ ≈ 29,2 cm** ..... $h^2 + 13^2 = 32^2$

5. **FA = $3\sqrt{9159}$ ≈ 287,1 m** ..... $FA^2 + 255^2 = 384^2$

6. **AD = $\sqrt{144{,}05}$ ≈ 12,0 m** ..... $AD^2 + 7{,}4^2 = 14{,}1^2$

7. **BC = $\sqrt{65}$ ≈ 8,06 m** ..... $BC^2 + 4^2 = 9^2$

8. **AD = $\sqrt{553719}$ ≈ 744 m** ..... $AD^2 + 541^2 = 920^2$
