Lösungen · Satz des Pythagoras

1. **$AB = 10\sqrt{13} \approx 36{,}1$ m** ..... $AB^2 = 12^2 + 34^2$

2. **1**
   $BF = 55$ cm ..... $BF = 80 - 25$
   $AB = 5\sqrt{146} \approx 60{,}4$ cm ..... $AB^2 = 25^2 + 55^2$

3. **Stab $= \sqrt{89{,}96} + 2 \approx 11{,}5$ cm** ..... $d = 2 \cdot 3{,}2 = 6{,}4$; $d^2 + 7^2 = s^2$

4. **$h = 3\sqrt{95} \approx 29{,}2$ cm** ..... $h^2 + 13^2 = 32^2$

5. **$FA = 3\sqrt{9159} \approx 287{,}1$ m** ..... $FA^2 + 255^2 = 384^2$

6. **$AD = \sqrt{144{,}05} \approx 12{,}0$ m** ..... $AD^2 + 7{,}4^2 = 14{,}1^2$

7. **$BC = \sqrt{65} \approx 8{,}06$ m** ..... $BC^2 + 4^2 = 9^2$

8. **$AD = \sqrt{553719} \approx 744$ m** ..... $AD^2 + 541^2 = 920^2$
